

# Beyond Graphene: Two-Dimensional Crystals

*Monday, 23 July 2012 09:45 (25 minutes)*

Antonio Castro Neto  
National University of Singapore

Graphene is possibly one of the largest and fastest growing fields in condensed matter research. However, graphene is only one example in a large class of two-dimensional crystals with unusual properties. In this talk I will briefly review the properties of graphene and look at the exciting possibilities that lie ahead.

**Primary author:** CASTRO NETO, Antonio (National University of Singapore)

**Presenter:** CASTRO NETO, Antonio (National University of Singapore)

**Session Classification:** Graphene I

**Track Classification:** Graphene
