September 6, 1984

Dear Colleague:

In August 1974 a collaboration was formed between GSI and LBL to study relativistic nuclear collisions. It has grown steadily, been very successful, and enormously productive. We would like to celebrate the tenth anniversary by giving all members and associates of the collaboration a souvenir photo. On the left is a computer reconstruction of an event detected in the Plastic Ball. On the right is a photograph of an event in the streamer chamber.

We look forward to a long and continuingly productive future collaboration.

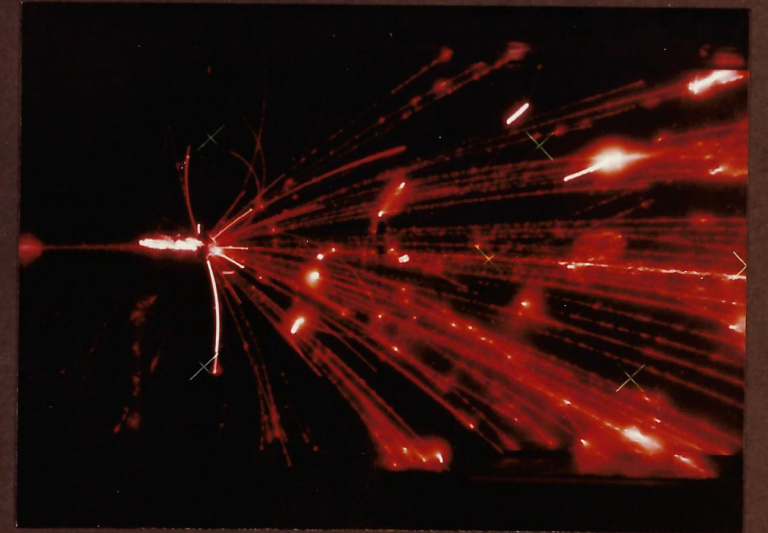

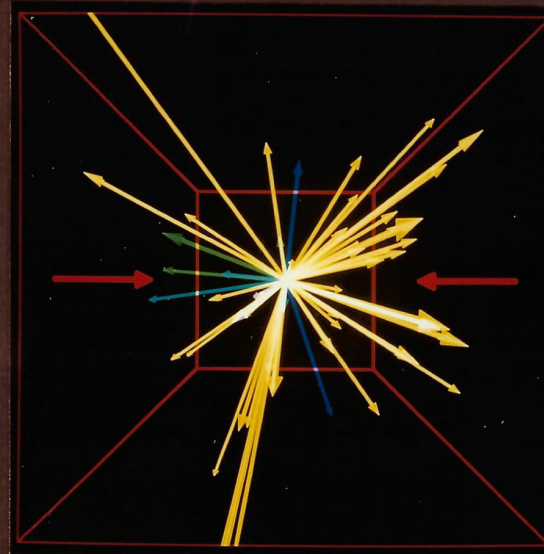

Sincerely yours,

Arthur M. Poskanzer

Reinhard Stock
