

Realistic seeding status

EIC RNC meeting
January 24th, 2023

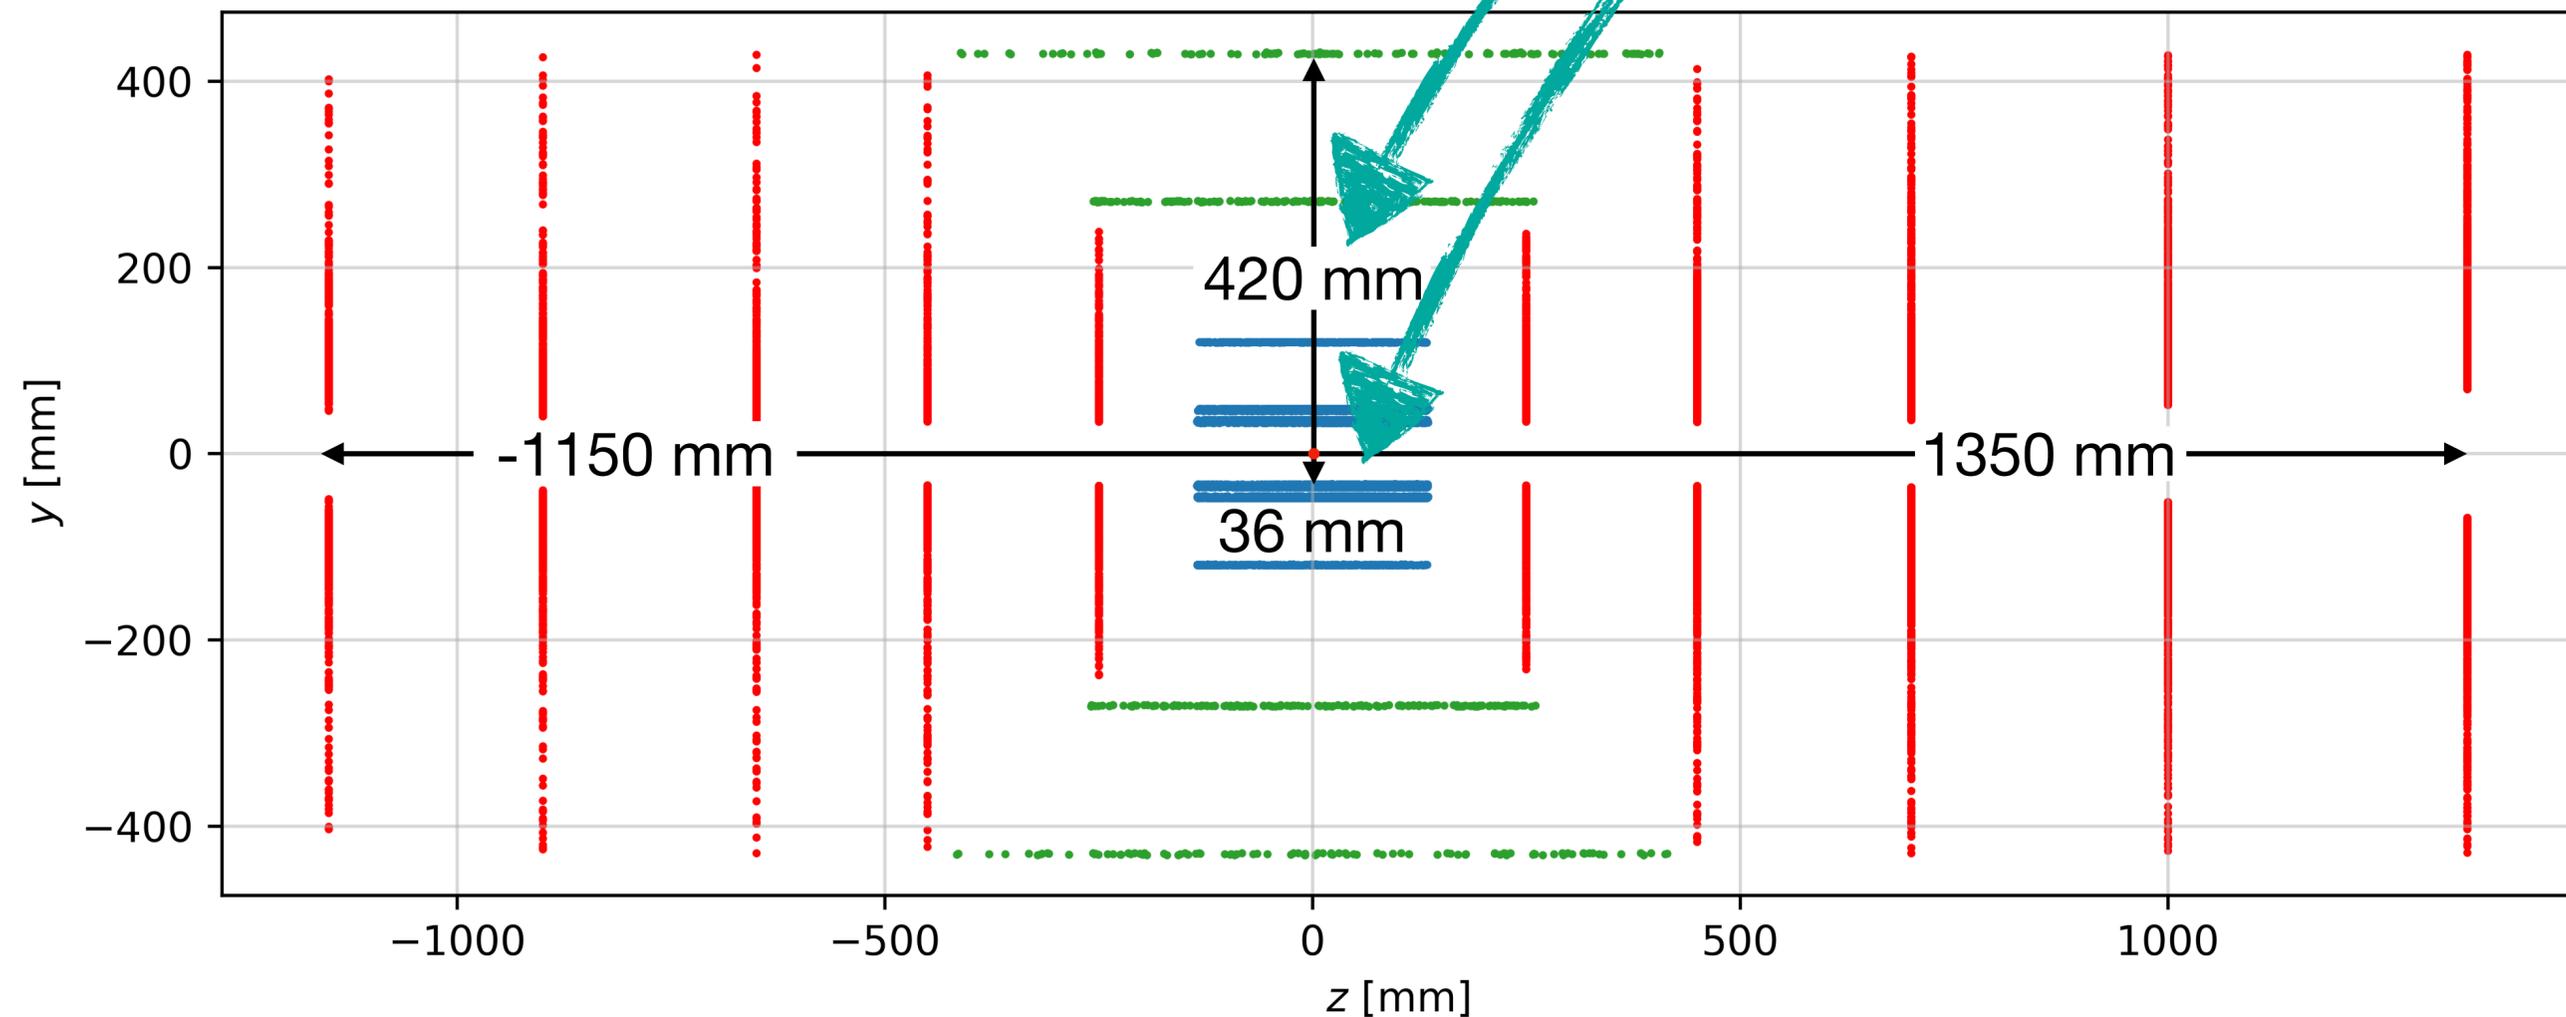

To recap

- Moving realistic-seeder work to ElCrecon
 - Y.S. Lai, et al. worked on (**ACTS-based**) seeder in **Juggler** (including some param optimization)
 - J. Osborn ported sPHENIX optimized (**ACTS-based**) seeder to **ElCrecon**
 - Need to optimize parameters
 - On 01/20/2023 Y.S. Lai and RCT copied over parameters from **Juggler** to **ElCrecon** seeder

ACTS-based meaning that the base code came from ACTS. Both seeders have common variables, etc.

Parameters from
juggler

geometry:
Brycecanyon

Multiple track reconstruction as a function of momentum

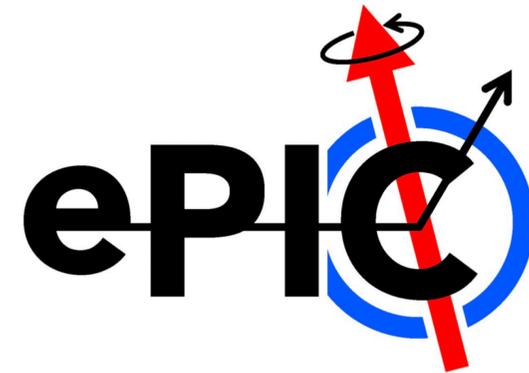

Summary

- Tested functionality of passing multiple seeder parameters at the command-line level
- Copied over and ran seeder with parameters from Y.S. Lai
- Started writing bash scripts to test many parameter sets

Next steps

- Perform a one-by-one parameter scan to assess sensitivity and understand parameter effect
- Perform a grid search to optimize parameters

Thanks for your attention
